

Walters Mann

Senior Java Full Stack Developer

Email: manniboh@gmail.com | **Phone:** +234 907 456 3104 | **Location:** Port Harcourt, Nigeria

GitHub: github.com/mannynasinmoney9 | **Twitter/X:** @mannynasinmoney | **Available:** Onsite (5 days/week) · Open to relocation to Fort Worth, TX

PROFESSIONAL SUMMARY

Senior Java Full Stack Developer with strong expertise in building scalable, high-performance enterprise applications using Java, Spring Boot, and Microservices architecture. Experienced in cloud platforms (AWS / Azure), distributed systems, and event-driven architectures using Apache Kafka. Adept at designing resilient systems, implementing CI/CD pipelines, and collaborating within Agile environments to deliver robust, production-grade solutions.

TECHNICAL SKILLS

Backend Development	Java, Spring Boot, Spring Cloud, Microservices Architecture, Hibernate/JPA
Frontend Development	Angular, React, Next.js, TypeScript, HTML5/CSS3, Tailwind CSS
Cloud & DevOps	AWS, Azure, Docker, Kubernetes, Terraform, Linux
Messaging & APIs	Apache Kafka, Kafka Streams, REST APIs, GraphQL, gRPC, WebSockets
Databases & Storage	MongoDB, PostgreSQL, MySQL, Redis, Elasticsearch
CI/CD & Version Control	GitHub Actions, Azure DevOps, Jenkins, Git/GitHub
Testing & QA	JUnit, Mockito, TestNG, Selenium, Postman, Cypress, Cucumber
Other	Object-Oriented Design, System Design, Agile (SCRUM), Performance Optimization

PROFESSIONAL EXPERIENCE

Senior Java Full Stack Developer

Jan 2022 – Present · Confidential / Available on Request

- Designed and developed scalable microservices using Java and Spring Boot.
- Implemented event-driven architecture using Apache Kafka for real-time data processing.
- Built and deployed applications on AWS and Azure cloud environments.
- Developed RESTful APIs and integrated third-party services.
- Used Docker and Kubernetes for containerization and orchestration.
- Automated build and deployment pipelines using GitHub Actions and Azure DevOps.
- Worked with MongoDB and PostgreSQL for high-performance data storage.
- Collaborated in Agile SCRUM teams to deliver features efficiently.
- Improved application performance, reliability, and scalability across services.

Java Backend Engineer

2020 – 2022 · Independent / Contract

- Delivered Spring Boot REST APIs for client-facing products.
- Implemented JWT and OAuth2 authentication across multiple services.
- Designed PostgreSQL and MongoDB schemas optimized for read-heavy traffic.
- Wrote comprehensive JUnit and Mockito test suites with 80%+ coverage.
- Set up CI/CD on GitHub Actions for several client projects.

Software Engineer

2019 – 2020 · Earlier Roles

- Shipped full-stack web applications with Angular / React and Spring Boot.
- Implemented core authentication and API security patterns.
- Wrote integration and end-to-end tests using Selenium and Cypress.
- Participated in code reviews and Agile sprint cycles.

PROJECT EXPERIENCE

Enterprise Microservices Platform

Java · Spring Boot · Kafka · AWS · Docker · Kubernetes

- Built distributed microservices system using Spring Boot, decomposing a legacy monolith into bounded-context services.
- Integrated Apache Kafka for asynchronous, event-driven communication.
- Deployed on AWS EKS with Docker containers, orchestrated via Kubernetes.
- Improved throughput from ~500 to 12,000+ events/sec; deploy time cut from 4 hours to under 8 minutes.

Arnose Insurance Platform (Full Stack)

Next.js 14 · Spring Boot 3.2 · PostgreSQL · JWT · Groq AI

- Designed end-to-end AI-powered insurance platform — Next.js frontend, Spring Boot backend.
- Implemented JWT-secured REST APIs, role-based authorization, and resilient middleware.
- Integrated Groq-based AI assistant as a guarded backend proxy.

Event-Driven Pricing Engine

Kafka Streams · Spring Boot · Redis · Azure AKS

- Real-time pricing pipeline ingesting 10K+ events/sec under sub-50ms p99 latency.
- Stateful Kafka Streams with idempotent producers (exactly-once semantics).
- Redis read-through cache for hot reference data; chaos-tested in staging.

EDUCATION

Bachelor's Degree in Computer Science

Coursework grounded in Algorithms, Data Structures, Operating Systems, Databases, Distributed Systems, and Software Engineering practices.

CERTIFICATIONS

- AWS Certified Developer / Solutions Architect — *in progress*
- Oracle Certified Java Developer — *in progress*
- Spring Professional — *in progress*
- Certified Kubernetes Application Developer (CKAD) — *in progress*

KEY COMPETENCIES

- Strong problem-solving and analytical skills.
- Excellent communication, both technical and non-technical.
- Designing scalable and resilient distributed systems.
- DevOps culture and ownership of CI/CD pipelines end-to-end.
- Mentoring engineers and leading code reviews.

- Translating ambiguous requirements into clean architecture.

ADDITIONAL INFORMATION

- Willing to work onsite, 5 days per week.
- Open to relocation, including to Fort Worth, TX.
- Available to start immediately.
